Certified Green Project Manager Level b (GPM-b™)

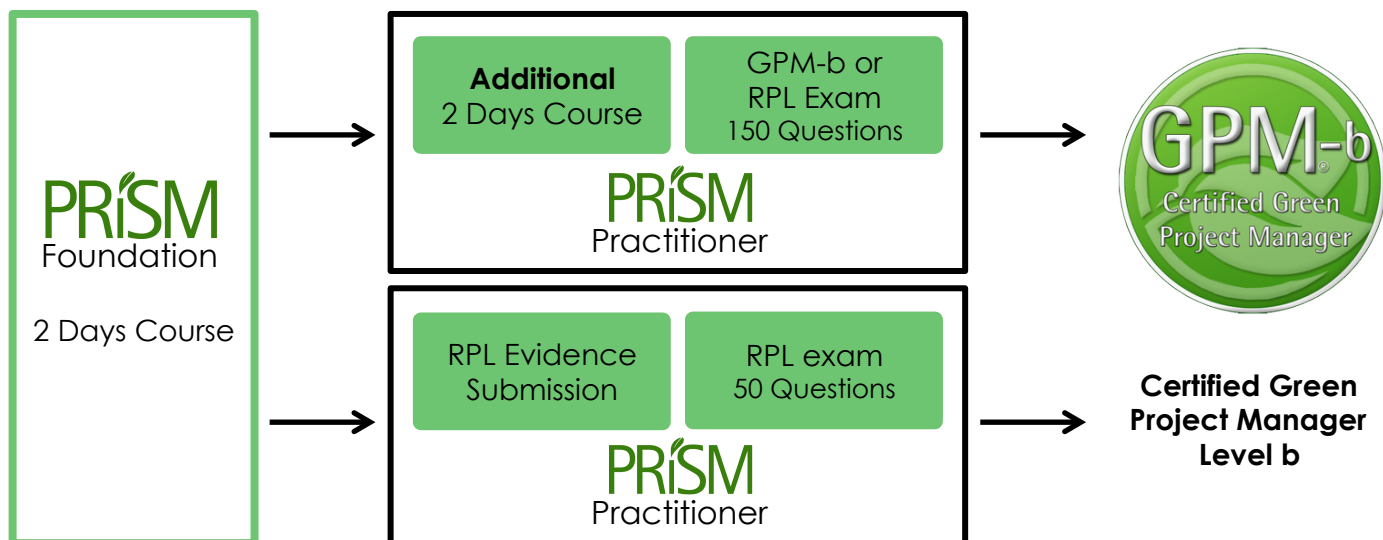

The **Certified Green Project Manager-b (GPM-b™)** is foundational knowledge-based certification that embodies the commitment of a project management professional to act as an agent of change to manage and direct efforts to maximize sustainability within the project life cycle, improve the construct and delivery of goods and services produced as a project deliverable, and thoroughly considering and accounting for environmental impacts in the project management roles assigned using measurable standards.

The Green Project Manager (GPM-b) certification is **the first** project management credential for individuals demonstrating knowledge in delivering projects using sustainable methods.

The GPM Sustainability Centre of Excellence
www.greenprojectmanagement.org

Investors, shareholders, consumers, and employees are increasingly putting pressure on corporations for products and services that are less damaging to the natural environment and society.
